

RSSL SEMINAR

**Allergen Cleaning Validation —
from concept to execution**

**A FREE event for the Food, Drink
and Related Industries**

Location: Reading

Date: Thursday 22nd November 2018

This interactive seminar will focus on how to validate and verify your allergen cleaning procedures to ensure they are effective and support your allergen management strategy.

ALLERGEN CLEANING VALIDATION SEMINAR

Cleaning acts as a vital control in the production of safe food. The demand on food manufacturers to produce broader product ranges and to make 'free-from' claims, means that effective cleaning from an allergen perspective is critical. Planning a cleaning validation programme to ensure it is fit for purpose is a challenge and approaches across industry can vary.

This seminar will help guide you in the best strategy for your business.

On **22nd November 2018**, we will be hosting a seminar which will address the challenges around cleaning validation. It will provide an overview of the key aspects that should be considered in order to ensure an effective validation of your cleaning.

We will provide an overview of:

- Latest news on allergens and recent incidents
- Best approach to allergen testing
- Aspects to consider in planning your cleaning validation programme
- How to interpret your analytical results

During and after lunch you will have the opportunity to network with fellow industry professionals and our expert team to discuss current industry issues and share ideas.

PROGRAMME

09:00	Registration and coffee
09:30	Welcome and introduction to RSSL
09:50	Introduction to allergens
10:00	Allergen testing — why, when, what and how?
10:25	Cleaning validation — practical considerations
