

## Time for new sensations in beverage production?

### Ask your separation specialist!

ANDRITZ serves production processes for beer, wine, juices, coffee, tea, soy drinks and many more. In today's fast moving marketplace, timing – next to taste – is everything. Which is why it is essential to have a production line that is reliable, responsive, scalable and efficient in consistently high quality production. This is where ANDRITZ's many years of experience and the broad product portfolio of mechanical and thermal solid-liquid separation solutions come in, such as separators, decanter centrifuges, filter presses and many more.

ANDRITZ ArtBEV clarifier

The ANDRITZ ArtBEV clarifiers – a plug-and-play solution that fits perfectly into a processing line - are able to maintain the highest nutritional value and all the health properties of the product. These separators are easy to install, operate and maintain and ensure an extremely efficient separation. ArtBEV two-phase separators are applied in solids load and turbidity reduction, yeast removal and any other application where fine solids have to be separated from a liquid phase, either to recover a valuable substance or to remove and dispose of a waste product. Efficient separation and precisely controllable, automated solids discharge allow the best possible separation effect. Solids from 0.5 to 500 µm, depending on their nature, can be separated efficiently in these two-phase separators.

Whether you are an international group or a family company, our mission is the same: to provide reliable, hygienic and efficient solutions that improve the quality of the end products, combined with proven service and innovative automation solutions – all from a single source.

#### **ANDRITZ GROUP**

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems and services for the pulp and paper industry, the hydropower sector, the metals processing and forming industry, pumps, solid/liquid separation in the municipal and industrial sectors, as well as animal feed and biomass pelleting. The global product and service portfolio is rounded off with plants for power generation, recycling, the production of nonwovens and panelboard, as well as automation and digital solutions offered under the brand name of Metris. The publicly listed group today has around 27,800 employees and more than 280 locations in over 40 countries.

#### **ANDRITZ SEPARATION**

ANDRITZ Separation provides mechanical and thermal technologies and services for solid/liquid separation, serving the chemical, environmental, food, mining and minerals industries. The customized, innovative solutions focus on minimizing the use of resources and achieving highest process efficiency, thus making a substantial contribution towards sustainable environmental protection. In addition, the business area offers technologies and services for the production of animal feed and biomass pellets.
